SEOS RECRUITS STEVE BLACK AS APPLICATIONS ENGINEER

SEOS is pleased to announce the appointment of Steve Black into the R&D group as Applications Engineer. Steve will be working on product and system developments and helping to bring these to the market. He will also be involved in key programs, both at the proposal and design stages.

Steve has worked in the visual simulation systems business in a variety of engineering functions for 27 years. His skills lie in the conceptualization and implementation of simulator solutions for vehicle training and engineering design applications. A member of the Society for Information Display and the IMAGE Society, Steve has also been awarded several patents for work in electronic and systems design.

Commenting on his appointment, Steve said, "Over the years I have been favourably impressed with the innovative product developments and the fine customer support SEOS has provided to the simulation/visualization industry. I am excited to have the opportunity to join this team and look forward to contributing further to their success."

Geoff Blackham, Chief Technology Officer, SEOS, added, "Steve brings to SEOS a wealth of industry experience and technical expertise. He will undoubtedly be a valuable asset and member of our organization and we are excited to have Steve join us."

ABOUT SEOS

SEOS is a leading global supplier of display and immersive solutions for simulation and visualization, delivering advanced solutions for the civil and military, training and research, visualization, leisure and entertainment markets.

SEOS has established a worldwide reputation for supplying innovative, high quality, cost-effective display solutions combined with a high level of expertise and exceptional service. A comprehensive range of services and unequalled design system integration capability provide a display solution that is custom designed and built for its application.
