MECHTRONIX ORDERS THREE DISPLAY SYSTEMS FROM SEOS

SEOS has received an order from Mechtronix Systems Inc (MSI) for the supply and installation of three motion-compatible PANORAMA® Lightning display systems. These will initially be installed at the MSI facility in Montreal, Canada in December 2005 and January 2006.

Each collimated display will use a 10ft radius spherical section film mirror, front projection screen and three LCoS™ projectors to achieve a 180° x 40° field of view.

Lightning is a version of the successful PANORAMA display system range designed to provide a more compact and lower priced collimated, wide field-of-view display system for specific applications.

PANORAMA is a registered trademark of SEOS
LCoS is a trademark of Brillian Corporation

ABOUT SEOS

SEOS is a leading global supplier of display and immersive solutions for simulation and visualization, delivering advanced solutions for the civil and military, training and research, visualization, leisure and entertainment markets.

SEOS has established a worldwide reputation for supplying innovative, high quality, cost-effective display solutions combined with a high level of expertise and exceptional service. A comprehensive range of services and unequalled design system integration capability provide a display solution that is custom designed and built for its application.
