SEOS TO SUPPLY DISPLAY SYSTEM FOR US NAVY MH-53E OPERATIONAL FLIGHT TRAINER UPGRADE

At I/ITSEC 2005 SEOS signed a contract with Indra Systems, Inc., a subsidiary of Spain's Indra Sistemas, S.A., for a visual display solution upgrade for the MH-53E helicopter operational flight trainer. The system will be installed at Naval Station, Norfolk, VA., in 2006.

The 11ft motion-compatible PANORAMA[®] display will provide a 210°x 60° (-25°/-35°) field-of-view. Comprising five CRT channels, this unique configuration will also use four Zorro[®] 1410 projectors to provide two chin window displays and two rear view window displays – all NVG compatible. The upgrade will include SEOS' Mercator digital distortion correction, Navigator reference alignment and Odyssey control facility.

The PANORAMA range uses collimated displays to provide wide angle images at optical infinity, giving cockpit occupants an accurate view of the outside world. PANORAMA is the only simulator display system to have repeatedly achieved helicopter Level D (FAA AC 120-63) certification.

Richard Layfield, VP Sales USA, SEOS, explained, "SEOS solutions are designed to be flexible and in this instance the requirements of the MH-53E meant tailoring the solution to meet the customer's specific criteria. This is what SEOS does best."

The MH-53E is the western world's largest helicopter and is used primarily for Airborne Mine Counter Measures (AMCM), with a secondary mission of shipboard delivery. It also has the ability to perform Vertical Onboard Delivery (VOD) missions as well as transportation of personnel and cargo.

ABOUT SEOS

SEOS is a leading global supplier of display and immersive solutions for simulation and visualization, delivering advanced solutions for the civil and military, training and research, visualization, leisure and entertainment markets.

SEOS has established a worldwide reputation for supplying innovative, high quality, cost-effective display solutions combined with a high level of expertise and exceptional service. A
