SEOS TO SUPPLY PANORAMA DISPLAYS TO OPINICUS FOR ECLIPSE 500 PROGRAM

SEOS, Sussex, UK, has signed a supply agreement with OPINICUS, Florida, USA for the delivery of PANORAMA optics units for the Eclipse 500 program. This multi-simulator contract involves initial installation of the first two units at OPINICUS' new manufacturing facility in Lutz, Florida before final integration on site in Denver. Follow on units will be delivered straight to the training facility at Denver.

SEOS will be supplying its 9ft radius, 180° x 40° PANORAMA system, efficiently configured to accommodate the smaller cockpit size of the Eclipse 500. The PANORAMA range uses collimated displays to provide wide angle images at optical infinity, giving cockpit occupants an accurate view of the outside world. PANORAMA is the only simulator display system to have repeatedly achieved helicopter Level D (FAA AC 120-63) certification.

Jim Takats, CEO, OPINICUS says "The SEOS 9ft PANORAMA was selected because of its superior performance and its uniquely compact configuration. SEOS has been able to commit to our short delivery timescales and due to past experience we know that our engineering teams work well together to ensure seamless integration and an excellent product overall."

Richard Layfield, VP Simulation Sales USA, SEOS, says, "We are pleased to be working with Opinicus on this great project. SEOS is delighted to see the launch of the Eclipse 500 aircraft and participate as an integral part of the training program for pilots that will be rated in the aircraft."

PANORAMA is a registered trademark of SEOS

ABOUT SEOS

SEOS is a leading global supplier of display and immersive solutions for simulation and visualization, delivering advanced solutions for the civil and military, training and research, visualization, leisure and entertainment markets.
