SEOS INVESTS IN PAXFORD COMPOSITES

SEOS is pleased to announce that it has made a strategic investment in Paxford Composites Limited, a key supplier since 1990. Paxford, based in Huntingdon, Cambridgeshire specializes in the design and manufacture of high-quality GRP mouldings and reinforced plastics products.

This follows the announcement last month that SEOS has acquired the business of another of its key GRP suppliers, Logical Limited.

Paxford Composites employs 70 people and manufactures a wide range of products in advanced composites.

As a part of the agreement John Bullivant, SEOS CEO, will take a seat on the board of Paxford Composites. John explains, "For SEOS this move represents an important part of our strategy to develop our Large Scale Optics activities. Both companies will work closely together to develop and introduce new products, while improving lead times for our customers."

Glenn Ford, Managing Director, Paxford Composites says "Paxford Composites have enjoyed a long relationship with SEOS over the best part of two decades. This investment not only seals a continuing partnership, but also reinforces a commitment by both companies to invest in new processes and technology, which will underpin plans for future growth."

ABOUT SEOS

SEOS is a leading global supplier of immersive visual display solutions, offering a complete design, development, production, installation and support service. Our products are used worldwide in simulators for military and commercial flight, air traffic control, marine, surface transportation, and for digital immersive theater applications.
