SEOS RECEIVES ORDER FOR SEVEN PANORAMA LIGHTNINGS

SEOS has received an order for seven PANORAMA® Lightning visual displays. Each 10ft, 3-channel system will provide a 180° x 40° field-of-view and be motion compatible. Delivery of all systems will be completed by June 2008.

The PANORAMA® Lightning configuration is a front-projected system which combines low price with high performance. It has been developed to take advantage of the higher brightness, lower cost and reduced maintenance characteristics of fixed matrix projectors.

Richard Layfield, VP Sales USA, SEOS, says “Our established working relationship with the customer has enabled us to refine our products to come up with a standard configuration product that meets their requirements for a variety of aircraft types. We always prefer a partnership approach, which in this case has reduced costs and enabled delivery within 6 months from order placement.”

PANORAMA is a registered trademark of SEOS.

ABOUT SEOS

SEOS is a leading global supplier of immersive visual display solutions, offering a complete design, development, production, installation and support service. Our products are used worldwide in simulators for military and commercial flight, air traffic control, marine, surface transportation, and for digital immersive theater applications.
