## **SEOS ENTERS INTO A 5-YEAR PURCHASE AGREEMENT WITH CAE FOR 11FT CROSS-COCKPIT COLLIMATED DISPLAYS**

SEOS and CAE have signed a 5-year supply agreement for the 11ft PANORAMA<sup>®</sup> optics system. Under the terms of the agreement, CAE will acquire its 11ft cross-cockpit collimated displays from SEOS.

SEOS has been supplying 11ft PANORAMA displays to CAE for over eleven years and is the only company who can supply this ultra-high specification product. This move will enable CAE to satisfy a number of its current and future programs, while securing commitment of supply. The SEOS-CAE relationship has continued to strengthen, with SEOS also supplying 2015HC LCOS projectors and Griffin rear-projected dome displays for some CAE military programs.

John Bullivant, CEO, SEOS, commented, "I am delighted that this strategic agreement is now in place and it reinforces our long-term relationship with CAE. I look forward to an ongoing and mutually successful relationship between our two organizations".

PANORAMA is a collimated display system designed for use on simulators requiring a wide field of view and cross-cockpit views. It is particularly suitable for simulators with side-by-side crew seating, such as airliners, helicopters, military transport aircraft and ground vehicle simulators. The 11ft radius PANORAMA is unique in its performance, offering the largest field of view available in the market using film mirrors.

*PANORAMA is a registered trademark of SEOS.*

### **ABOUT SEOS**

SEOS is a leading global supplier of immersive visual display solutions, offering a complete design, development, production, installation and support service. Our products are used worldwide in simulators for military and commercial flight, air traffic control, marine, surface transportation, and for digital immersive theater applications.
